What are we looking for-

We are looking for a Tech Lead – Cloud & AI with strong hands-on experience in .NET, Azure, and Generative AI. The role will involve translating architecture into implementation, leading developers, and driving solutions from development through production.

Responsibilities

- Lead developers while remaining hands-on with **coding, design, and technical implementation.**
- Convert solution architecture into **implementation-level technical designs, components, and development tasks.**
- Design and develop scalable **.NET/C# backend services, REST APIs, microservices, and enterprise integrations.**
- Build and integrate cloud solutions using **Microsoft Azure,** including APIs, databases, messaging, storage, security, monitoring, and CI/CD.
- Develop practical **Generative AI solutions** using **LLMs, RAG, embeddings, vector search, prompt engineering, tool/function calling, and AI Agents.**
- Integrate AI solutions with **enterprise APIs, databases, and business systems.**
- Own **code reviews, design reviews, coding standards, testing, and technical quality.**
- Troubleshoot complex **application, cloud, integration, performance, and AI-related issues.**
- Make day-to-day technical decisions around **code structure, libraries, engineering practices, AI workflows, and cloud implementation** within the agreed architecture.
- Mentor developers, support technical knowledge sharing, and participate in **technical interviews.**
- Drive technical execution across **development, testing, deployment, and production support.**

Requirements:

- 6+ years of software development experience with strong **C#/.NET and backend engineering** expertise.
- Strong hands-on experience with **Microsoft Azure** and cloud-native development.
- Practical experience building **LLM/GenAI applications.**
- Hands-on knowledge of **RAG, vector databases/search, embeddings, tool/function calling, and AI Agents.**
- Experience with **REST APIs, microservices, databases, enterprise integrations, and distributed systems**.
- Strong understanding of **software design patterns, clean code, SOLID principles, testing, and engineering best practices.**
- Strong debugging, problem-solving, communication, and technical leadership skills.

What is on Offer

- Competitive salary and benefits package (health insurance, paid time off, etc.
- Open work culture that encourages you to excel, and explore the latest technology stack.
- Opportunity to take ownership and make decisions with the support of experienced leadership.
- Flexible working hours to support productivity and maintain a healthy work-life balance.

Equal Opportunity Commitment

At Arna, we foster an environment where every employee feels valued, respected, and empowered to contribute their unique perspectives and talents to our success. We welcome people from all backgrounds irrespective of their race, color, religion, gender, sexual orientation, national origin, disability, or age.

Next Steps

If you are passionate about being a part of a company that is growing rapidly, we would love to hear back from you. Please fill out a short form by clicking on the following URL.
